Rating Rationale:

CRA's structural, operating, and portfolio and credit risk assessments remain valid from the prior rating action. The Fund has acquired two additional assets which have been incorporated in the quantitative analysis. Based on updated information on the current and planned portfolio by the manager, the analysis shows deteriorating results when compared to the previous year. Main factors include lower average asset returns and asset PDs as well as increased asset return volatility. However, CRA expects the manager to reach the Fund's prospected returns in the long term which leads to an overall unchanged rating of BBB-. The outlook remains stable.

Primary Key Rating Factors:

- (+) Asset manager's track record
- (+) Conditionality of coupon payments
- (+) Reasonably good predictability of wind and solar farm yields from the time the operating phase is reached / Partial market and electricity price security through design of subsidy regimes or power purchase agreements
- (+) Geographical diversification of the assets / Fundraising above target
- (-) Subordinated use of issue proceeds within the whole transaction structure
- (-) Blind pool investment share of the Fund
- (-) Assets partly exhibit construction and FX risks
- (-) Offshore wind parks are exposed to a higher risk profile compared to onshore wind and solar farms / No reliable empirical experience on the long-term operation of offshore wind energy plants
- (-) Economic risks from geopolitical conflicts and persistently high inflation and interest rate levels

Ratings Sensitivities:

Best-case scenario: In this scenario, we increased the returns of the portfolio assets by an amount of 10% (ceteris paribus), resulting in a rating of BBB-.

Worst-case scenario: In this scenario, we decreased the returns of the portfolio assets by an amount of 20% (ceteris paribus), resulting in a rating of BB.

ESG-Criteria:

CRA generally takes ESG-relevant factors (environmental, social and governance) into account when assessing the rating object. In the present case, ESG criteria had a low comprehensive impact to the rating.

The subsequent ESG factors were considered:

- Impact on environmental quality through CO₂ savings (E)

Rules on the Presentation of Credit Ratings and Rating Outlooks

The approval of credit ratings and rating outlooks follows our internal policies and procedures. In line with our "Rating Committee" policy, all credit ratings and rating outlooks are approved by a rating committee based on the principle of unanimity.

To prepare this credit rating, CRA has used following substantially material sources:

1. Transaction structure and participants
2. Transaction documents
3. Issuance documents

There are no other attributes and limitations of the credit rating or rating outlook other than those displayed on the CRA website. Furthermore CRA considers satisfactory the quality and extent of information available on the rated entity. In regard to the rated entity Creditreform Rating AG regarded available historical data as sufficient.

Between the time of disclosure of the credit rating to the rated entity and the public disclosure, no amendments were made to the credit rating.

This rating was not endorsed by Creditreform Rating AG from a third country as defined in Article 4 (3) of the EU Regulation 1060/2009.

The “Basic Data” information card or the press release published on Creditreform Rating’s website indicates the principal methodology or version of methodology that was used in determining the rating, with a reference to its comprehensive description.

In cases where the credit rating is based on more than one methodology or where reference only to the principal methodology might cause investors to overlook other important aspects of the credit rating, including any significant adjustments and deviations, Creditreform Rating AG explains this fact in the credit rating report and indicates how the different methodologies or other aspects are taken into account in the credit rating. This information is integrated in the credit rating report.

The meaning of each rating category, the definition of default or recovery and any appropriate risk warning, including a sensitivity analysis of the relevant key rating assumptions, such as mathematical or correlation assumptions, accompanied by worst-case scenario credit ratings and best-case scenario credit ratings are explained.

The date at which the credit rating was initially released for distribution and the date when it was last updated including any rating outlooks is indicated clearly and prominently in the “Basic Data” card or in the press release published on Creditreform Rating’s website as a “rating action”; first release is indicated as “initial rating”, other updates are indicated as an “update”, “upgrade or downgrade”, “not rated”, “confirmed”, “selective default” or “default”.

In the case of a rating outlook, the time horizon is provided during which a change in the credit rating is expected. This information is available within “Basic data” information card in Creditreform’s basic document “Rating Criteria and Definitions”.

In accordance to Article 11 (2) EU-Regulation (EC) No 1060/2009 registered or certified credit rating agency shall make available in a central repository established by ESMA information on its historical performance data, including the ratings transition frequency, and information about credit ratings issued in the past and on their changes. Requested data are available at the ESMA website:

<https://cerep.esma.europa.eu/cerep-web/statistics/defaults.xhtml>.

An explanatory statement of the meaning of Creditreform’s default rates are available in the credit rating methodologies disclosed on the website. Further information can also be found on the CRA website in the document “Rating Criteria and Definitions”.
